

AP Environmental Science 2021-2022

Summer Assignment

Welcome to AP Environmental Science! I'm looking forward to working with you next year. In order to cover all the material for APES before the AP exam next May and to set the tone for the class you will need to complete some work during the summer.

There are two parts to the summer assignment, which are located on my Google Classroom. The login for my AP Environmental Classroom is: **63v5pfc**

If you have any questions about the assignment, feel free to email me at coy.zerhusen@oldham.kyschools.us. The summer assignment will be counted as a grade. All work turned in must be your own work. The assignment is as follows:

Part I: Introduction to AP Environmental Science Assignment – Due the 1st Monday of school.

- During the school year we will be pushed to get all of the content in by the AP test, so you will need to do a little reading before school begins (I know you are excited).
- We will review the content of the first two chapters with this assignment.
- Each assignment has videos to watch with questions to answer and topics to respond to.
- There are also a few articles to read and analyze.

Part II: Easter Island Assignment – Due the 1st Monday of school.

- The assignment is linked on my google classroom under summer assignments.
- Read the article and answer the discussion questions.
